You know you are on the “Complications / PI” tab when the tab is highlighted. The information on the screen should be the same as what you see here.

The “Complication” element is any medical complication that occurred during the patient’s stay at your hospital. Select an option from the drop-down menu. This is a National Data Element.

Complication Screen (3)

The screenshot displays the 'Complication Screen (3)' within a medical software interface. At the top, a horizontal navigation bar includes tabs for 'Imaging', 'Injury', 'Pre-Hospital', 'ED / Acute Care', 'Initial Assessment', 'Diagnoses', 'Comorbidity', 'Procedures', 'Complications' (which is highlighted in orange), and 'Outcome Info'. Below this, the 'Incident Information' section contains fields for 'Validity: 88%', 'Status: In Progress', 'Lock: Unlocked' (with a dropdown arrow), 'Import Status: Typed In', and 'Entered: 03/21/13 by Katherine Gatz'. To the right, 'Validity Information' includes 'Trauma Registry #: IT-130321-097', 'Patient: ', 'Medical Record Number: 123456789', 'NTR Inclusion: No', and 'Updated: 03/21/13 by Katherine Gatz'. A yellow banner below these sections reads 'Procedures Saved'. The main 'Complications' section features a header 'Complication (NTDB Complication Definition)' with a help icon. Below the header, it states 'No Complications Have Been Entered'. There are two dropdown menus: the first is set to 'Cardiovascular' and the second is labeled 'Select Complication'. To the right of these is a text area for 'Further Explanation/Action:'. A blue 'Add Complication' button is positioned below the dropdowns. At the bottom of the screen, there are three buttons: 'Back' (with a left arrow), 'Save' (with a floppy disk icon), and 'Save and Continue' (with a floppy disk icon and a right arrow). The text 'Indices Patient Register' is partially visible at the very bottom.

Once you select the general complication, select an option from the additional drop-down menu that defines the complication further. This is a National Data Element. The "Further Explanation/Action" element allows you to textually explain the complication further.

Once you enter the complication information, you must save it by clicking on the "Add Complication" button. You can also add additional complications as needed.

Click the "Save and Continue" button to save the information just entered and to continue to the next tab. Clicking the "Save" button will save the information, but you will not progress to the next tab.
